Municipal Council Holds a Meeting

The council of the M.D. of Lacombe No. 398, met at the office of the secretary on November 13th at 1 p.m.

All of the members were present with Reeve Sherburne in the chair.

The minutes of the previous meeting were adopted as read on motion of Councillor Cockrell.

The secretary presented a letter from the Attorney General's Department re responsibility for the maintenance of bridge 35 and 36 39-23-4, the letter stated that in

Women's Meetings

Ladies Aid 2nd Thursday in each month.

W. I. meet the 1st Saturday in every month.

United Church Sunday School executive 3rd Wednesday.

School Report for Sept. and October

The following is the report for September and October of the Mirror schools.

3rd year High School — Norman Ray 80, Emma Durrant 78, Freda McDonald 77, George Oldring 75, James Holditch 73, Harry Jewell 71, Benah Marshall 70, Ernest Colman 66.

2nd year High School — Harold Jewell 71, Leo Olson 71, Martin King 68.

1st year High School — Frances Holditch 81, Ella McLaren 80, David Whiting 76, Henry Flowelling 68, Myrtle Syne 65.

Parents are cordially invited to visit the school at any time.

J. F. Baugh, Principal.

Grade 8 — Kathleen Hall 90, Virginia Bransiger 88, Willoughby Bryan 89, Mac Steele 78, Alma Pederson 66, Vera Brackney 65, Barbara Walker 64, Edward Hutchinson 62, Florence Zachark 60, Robert Cairns 57, Ruth Jewell 54, Robert Oldring 41, Donald and Lyman Sutley absent.

Grade 7 — Edith Hutchinson 72, May Durrant 71, Elsa Moller 70, Alice Beaman 67, Nettie Zachark 65, Thelma Purcell 63.

Continued on page 8

The opinion of the department the said bridge was within the Municipality of Lacombe and that the Municipality is responsible for its upkeep. After considerable discussion it was the unanimous opinion of the council that the Attorney General's department were

rather indefinite in its statement and that the matter be taken up still further with the department and Councillor Crown moved that Mr. Sherburne proceed to Edmonton and go into the matter thoroughly with them.

The committee Councillors Cockrell and Crown in connection with damages done by impounded cattle, the committee ap-

pealed to the court.

LOST — Between Flowellings' and the garage, a small change purse containing between \$2 and \$3. Mrs. E. E. Estell.

The Trail Rangers and Beavers gathered at the church on Monday after school and despite the cold weather made a great success of cutting up the wood pile. After their labors a fine supper was served under the direction of Mesdames A. J. Ray, J. W. Spence and H. S. Oldring.

A special meeting of the T. R. and Beavers was held on Tuesday evening in the club rooms and after an hour spent in games, Chief Geo. Oldring on behalf of the T. R.'s and Chief Douglas Williams on behalf of the Beavers, presented the Bryan brothers with fountain pens in recognition of their esteem.

After the event peanuts and candy were handed round and rousing cheers were given for the ghosts of the evening who will be greatly missed by the boys' clubs.

"Aunt Jerusy on the War Path" Played to a Capacity House Friday

Program:

ACT I — Scene in Aunt Jerusy's Kitchen on the Farm

Song — Mrs. Melvin Olson

ACT II — Carnival in the Village

Song — Mr. R. G. Lowe

ACT III — What Takes Place at the Carnival

Chorus

"God Save the King"

CASTE

Hiram Fish Village Constable K. D. Stewart
Aunt Jerusy Fish Hiram's Wife Mrs. A. W. King
Sufficiency Fish Hiram's son, Jerusy's stepson A. C. McNair
Sis Hopkins Hired Girl Mrs. G. N. Bryan
Elder Snuffles An Old Hypocrite H. Oldring
Miss Stella Etta Snuffles An Old Maid and Fiance of Elder Snuffles Mrs. A. Ray
Bill Barker Show Manager Claude Marshall
Elsie Barker Bill's wife and Carnival Queen Nettie Oldring
Madame Remno de Bono Fortune Teller Mrs. J. Kehoe
Dancing Girls Delta Simpson, Gertrude Pannicker, B. Slife, H. Jamieson and Grace Tulloch.

The Grand theatre was the scene of a wild and exciting time on Friday evening when full hall greeted "Aunt Jerusy on the War Path." At this stage of the game we should say that it was Jerusy's stepson who was actually on the war path and caused great merriment amongst the kids when he chased other players through the hall as a wild man.

The play was well put on, each and every member having his or her part well in hand. The play started promptly on time, and opened with Sis Hopkins doing her daily task as hired girl dusting to the tune "Fer, Fer Away." Then entered her sweetheart, Sufficiency Fish, who by the way would have gone on his knees to do her will if it had not been for the fact that he had accidentally sat in a basin of starch.

The theme of the play was the constable to see the pretty dancing girls, Sufficiency Fish to help his father, the Elder to meet his wife and Aunt Jerusy to watch her husband, while Sis Hopkins wanted to see the sights, proved the undoing of all. From this followed a climax after climax, until at the end Sufficiency Fish proved the hero by capturing the desperate and thieving

fortune teller with a clothesline which presumably occurred while telling Jim Purcell what his second wife would be like. The acts were interspersed with solos by Mrs. M. Olson and Mr. Hutchins, who sang in good form. A grand dance wound up the evening's entertainment. The occasion cannot be passed without a bouquet being handed to Mrs. N. Series for the excellent drawings made in connection with the posters, Mirror little dreaming that it had such gifted talent in its midst.

Keep the date open for the children's school concert in the theatre on Dec. 23rd.

Elks Memorial Service will be held in United Church Sunday at 7:30 p.m.

The LOB.A. is holding a dance on Friday, Dec. 10, with a children's masquerade from 8 to 10, the older ones then having the floor. Kirby-Bullivant orchestra. See posters for particulars.

Mrs. H. G. Williams entertained on Wednesday evening in honor of Mrs. G. N. Bryan, when about thirty ladies spent a most enjoyable evening and regretfully bade good-bye to the guest.

The members of the W. L. entertained in honor of Mrs. G. N. Bryan Thursday evening. The guests made 12 tables of whist and prizes were won by Mesdames Stirling and Mary White and Messrs. Goo, Jackson and N. Gaskill. Mrs. Bryan was presented with a beautiful silver cake plate. Those in charge of the affair were Mesdames Smathers and Watters.

Experiments In Hemp Growing In Western Canada Prove That Industry Is Practicable

Investigation and experiment in hemp growing in Western Canada, which was progressing favorably before the war, was brought to a standstill with the outbreak of hostilities and was not resumed for some time afterwards. Recently, however, work proceeded energetically by the Development Branch of the Canadian Pacific Railway in co-operation with the Department of Agriculture of the Dominion Government and the Department of Natural Resources of the same railway, has further established the suitability of the lands of the irrigated sections of Southern Alberta to this crop and paved the way to industrial manufacture involving the use of hemp. There would now appear to be no reason why the Prairie Province should not have a hemp-growing industry and engage in the manufacture of products now imported into the Dominion to the extent of some five million dollars annually. Careful analysis of the economically-wise work of exports fully justifies the conclusion that the hemp industry in Western Canada can be made a commercial and industrial success.

After preliminary experiments in 1924, three acres of hemp were sown in 1925 in the irrigation block at the St. Julian Colony, east of Calgary, at Tillic. Alberta. The three acres were subjected to different irrigations though the exceptional rainfall of the season largely equalized the effect of these irrigations. The full results of the experiment carried out by the above-named organizations have now been made available and are in every way gratifying and encouraging.

At harvest the stand of hemp was described by experts as a "bumper crop" of exceptional quality. One acre was cut and left in bundles on the ground to test the retting effect of exposure during the winter and spring. On examination in the following spring, it was found that though the hemp had not been spread, the outside bundles where exposed to the winter weather had been sufficiently retted. It was concluded that if properly spread on the ground under normal winter conditions, the hemp could be sufficiently retted in this manner. One acre was cut, spread to dry for about ten days and then shipped to the Forest of Ontario. One acre was cut and stored for retting. It was intended to irrigate this after spreading, but the unusually wet season made this unnecessary. This hemp received an excellent ret on the ground where it was grown and was then shipped to Forest for retching.

Shipments from the two acres shipped to the mill at Forest yielded 1,075 lbs. of dressed hemp, 108 lbs. of fine tow, and 149 lbs. of turged tow. The fibre shipped to twine mills at Kitchener was manufactured into a number of different grades of commercial twine, for which it proved entirely satisfactory. A total of 780 lbs. of twine hemp was produced, 450 lbs. being grade A, 250 lbs. grade B, and 80 lbs. dark hemp. The Alberta hemp, it is stated, graded equal to Italian T.B. hemp or Wisconsin hemp, which at prevailing prices would make the Southern Alberta product laid down at an eastern manufacturing plant worth about 12¢ a pound.

The successful results of these investigations had experiments open up great agricultural and industrial possibilities for Southern Alberta. The situation is ripe for commercial enterprise to take hold. A central hemp mill must be established and a sufficient acreage guaranteed for its operation (say 200 acres for a moderate sized plant) before the farmer can receive any return for putting in a hemp crop. The operation lends itself to co-operative organization among farmers within a suitable hinterland. An elaborate and complete analysis of the cost of production, mill operation, etc., has been prepared by the Development Branch, Department of Colonization and Development, Canadian Pacific Railway, Monreal.

Fish Dressing Plant

The first plant in Canada, outside of British Columbia, for the freezing of fish, poultry and eggs under the Otterson process, will be operating in Edmonton by June 1st, according to P. Johnson, managing director of the Johnson Fisheries Limited. His firm paid \$10,000 for the rights of the territory. The initial capacity of the plant will be 1000 tons a day.

Saskatchewan Wool Crop

Shipments of Saskatchewan wool are rising in volume. For the season to date 559,064 lbs. have gone forth as compared with 449,000 during the same period of 1925.

Many Immigrants Arrive

Immigration to Canada for First Nine Months of 1926 Shows 65 Per Cent Increase

Immigration to Canada for the first nine months of the calendar year 1926 shows an increase of 65 per cent over the same period 5 years ago, according to a statement issued by the department of Immigration and colonization.

In the nine months, January to September, inclusive, immigration to Canada amounted to 112,535 as compared with 67,878 for the same nine months in 1925. Of the 1926 immigration 41,419 were British, 16,716 from the United States and 51,649 from other countries.

The returns show substantial increases in all three classifications.

During September, 1926, immigration to Canada consisted of 4,152 British, 1,999 from United States, and 6,267 from other countries, a total of 12,469, compared with 6,666 in the same month a year ago. For August the immigration of 4,125 British, 2,552 from the United States, 2,269 from other countries, a total of 12,946 compared with 8,812 for August, 1925.

Saskatchewan Industries

Ten Industries Produced Goods of the Value of Over Twenty-six Million Dollars

According to final statistics the leading industries of Saskatchewan produced goods to the value of \$24,048,000 in 1925—an increase of \$3,275,000 over 1924. The ten leading industries are: Flour, butter and cheese; printing and publishing, electric light and power; bread and bakery products; plowing mills; sash and door factories; dyeing, cleaning and laundry work; aerated and mineral waters; and sawmills. Business concerns covering this broad field numbered 224 in the year of question, with a capitalized capital of \$22,131,301.

British Boys Coming

Will Attend Alberta Agricultural Schools This Winter

More British boys are coming to attend Alberta Agricultural Schools this winter. About 70 are expected, of whom 12 are already on the way, according to Provincial Government advice. The boys will be divided among the schools of Olds, Claresholm and Raymond. Next spring the Federal Government will undertake the placing of these boys to this country under the assisted passage scheme of the British Government.

Should Not Be Delayed

Farmers Entitled to Adequate Protection Against Fire

To the farmer has come in recent years the telephone, the motor car, the radio, hydro-electric energy, the rural mail delivery and other conveniences to make his life less lonely and to remove many of the disadvantages of living in the country. Among many of the advantages that have not yet come his way except in a few communities, is protection against fire. And we wish to point out that there is no reason why this should be long delayed.—Saskatchewan Reformer.

B.C. Tree Seeds Shipped To New Zealand

The largest shipment of tree seeds ever made within the British Empire was that of 3,260 lbs. of yellow pine seed sent from New Westminster to New Zealand by the Donation Government seed extraction plant at the former place. A further cargo of 2,500 lbs. of seed is to follow shortly. This seed will be planted on waste lands in New Zealand.

B.C. Lumber For Britain

"British Columbia Houses, Ltd." is the name of a new company capitalized at \$100,000; the object being to engage in export of mill cut lumber for the erection of houses in London, England. Land has been purchased in England for the site of these dwellings.

Proposed Jam Factory

A proposal to construct a large dehydration plant, jam factory, and vinegar and cider mill at Kelowna, B.C., to take care of waste fruit products of the district is being considered by the municipal council.

In order to forecast the weather with a reasonable degree of accuracy all you have to do is predict anything you don't expect.

Use Of Fertilizers

Manure for Grain Crops in the Prairie Provinces

Farmers in the prairie provinces have not hitherto been required to consider very seriously the fertility of the soil, but with the livestock population in that region constantly increasing, the question arises as to the most effective use of manure. With the object of determining the value of barnyard manure for wheat, oats and barley, and the proper time and method of applying it, a series of experiments have been conducted at the Scott, Sask., experimental station. The results of these experiments are detailed in the latest report of the Superintendent of the Station, which may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

In all the experiments the manure was applied at the rate of 12 tons per acre. In the experiments with wheat, which have been conducted for eleven years, rotted manure applied previous to ploughing in spring fall has increased the average yield of the first crop by three bushels per acre in one experiment and seven bushels in another. Applying rotted manure previous to spring ploughing has given a higher average yield than previous to fall ploughing, but part of the higher yield is probably due to the time of ploughing as spring ploughing has consistently given the highest yield at the Scott station. Fresh manure applied in winter has not increased the yield of wheat materially.

In the case of oats, fresh manure applied in winter on fall ploughing increased the yield by 10 bushels per acre. Rotted manure applied after sowing on fall ploughing increased the yield by 5 bushels per acre, and applied just before fall ploughing brought about an increase of 10.2 bushels. As to barley, the highest increase of nine bushels per acre was obtained by applying rotted manure just before fall ploughing.

The results therefore indicate that manure is most valuable when applied in a rotted condition just before fall ploughing or after sowing.

Good Market for Flax Straw

Flax straw is now in considerable demand in the United States and is moving from Saskatchewan across the border. Minnesota manufacturers are finding the local hay straw supply insufficient and are extending their purchases into Manitoba and Saskatchewan. Farmers who have flax straw are being advised to hold their stocks as prospects are good for finding a market for large supplies.

Alberta Oil Wells

The Stockmen Oil Well has struck a few of gas at a depth of 1,654 feet in the northwest area of Kneale Valley. In the Vulcan well, in the same valley, the flow of gas is now greater by 250,000 cubic feet per day, with drilling at the 1,940 foot level. Vulcan's total flow of natural gas is now 2,550,000 cubic feet per day; the gas is wet and drilling is cautious.

WORLD HAPPENINGS BRIEFLY TOLD

Dr. J. R. Hayes, personal physician to Abraham Lincoln, died at Washington, at the age of 95. He had wanted to live to be 100.

Major Charles William Orr, colonial secretary at Gibraltar, has been appointed Governor and Commander-in-Chief in the Bahamas.

Dr. Franz Exner, famous as a physicist, died in Vienna recently. He was noted for his calculations of the size of molecules and other achievements.

Fornson's 120,000 head hunters have not caused the Rev. Thomas Barry to lose any sleep in all his 52 years as a missionary on the island, and he has gone back to his work after six months leave in England.

Canada's total area estimated as seven to fall wheat up to October 23 last for the season, 1927, excluding British Columbia, is 897,300 acres, as compared with 992,600 acres, the area sown in 1925 for 1926.

Rockless automobile driving cost the lives of 79 persons in Canada in October and injuries to 50 others. Forty crossing accidents were reported, in 31 of which automobiles were involved.

The eighth Canadian egg-laying contest is being conducted at the experimental farm, Ottawa. The contest is made up of eighty pens. The entries again cover a very wide area, the West being represented as follows: British Columbia, 11 pens; Alberta, 2 pens.

The Arab tribesman who shot and killed A. G. Elliott, mechanician for the British aviator, Alan J. Cobham, last July, while making his London-Australia flight, has been found guilty of manslaughter. He was sentenced to five years "rigorous imprisonment."

The annual provincial seed fair, under the auspices of the provincial department of agriculture and Alberta Seed Growers' association, will be held this season in Edmonton on January 18, 19, 20 and 21. The annual convention of the Provincial Seed Growers' association will be held at the same time.

British Nation's Income

Estimated Average is Over One Pound Per Week for Each Person

The estimated income of Great Britain, say the Inland Revenue Commissioners, is now 2,960 million pounds, over £1 a week for every inhabitant. Of this amount the Inland Revenue took 510 millions in income tax, super tax, and death duties. Super tax was paid on incomes over £2,200 by 87,600 people, and 321 of them had incomes of £166,600.

Death duties were paid on 104,660 estates; but 26,600 of these were £260 or less. One estate was over three millions, and there were 12 between one and two millions.

The Drift To The Towns

By C. W. Peterson

We cannot escape the conclusion that the drift from farm to city is the direct cause of a subsequent drift from Canada to the United States. Also that the former cannot be regarded as a mere accident, but has a substantial social and economic formula.

Whether or not the causes can be wholly eliminated is a question which might possibly have to be answered in the negative, because they are to a very large degree of world-wide occurrence.

That this exodus from farm to city in Canada could be severely checked is, however, a fact which cannot be successfully refuted.

Our gross agricultural plant last year was worth 75½ billion dollars with a production of 3,716 million, which represents solid, new wealth.

If we take this total agricultural production and deduct the cash outlay of Canadian farmers for hired labor, seed and fertilizer, amounting to 33½ million dollars, and allow 6 per cent on capital invested in agriculture, or 150 million dollars, we get a net average return to the individual farm operator of \$570 for his year's work, which must be shared by his wife and children. If any, who did productive, unpaid work on the farm. Applying it all on account of the farmers' own wages however, on a ten-hour day basis, we get an hour rate of 29 cents. Compared with factory workers at 56½ cents per hour; railroad workers, 58½ cents per hour; miners, \$3.4 cents per hour, and workers in building trades, \$1.06 per hour. It does not look particularly inviting, even conceding that the farmer lives rent free. We have apparently here ample explanation of the drift to the cities of our young Canadian farm population.

Otto H. Kahn, the famous American multi-millionaire banker, dealing with the agricultural situation in the United States, recently made the following trenchant observations:

"If there is one calling which has a higher claim than another upon the helpful consideration of the State it is that of the farmer. The farmer's problem is part of our problem. The farmer's welfare is an essential part of our welfare."

"It is harmful and menacing to the Commonwealth that so numerous and so valuable a portion of the population should feel dissatisfied and resentful and be without prosperity. The situation lends itself peculiarly to the demagogue and to the plausible figments of the economic visionary."

"Both justice and self-interest demand of the community at large that every legitimate endeavor be put forth to the end that the farmer's grievances be redressed. If that redress can only be accomplished by methods which, while practicable and economically warrantable and promising to be effective, are novel and perhaps unpredictable to the established ways of business, then the less important will have to yield to the more important, i.e., business convenience and customs to the rehabilitation of the farming industry."

"It is not sufficient answer to the farmer's complaint to tell him sternly to the rigid functioning of the law of supply and demand and to the doctrine of the survival of the fittest; because to reply the farmer will contend that, in other respects, for reasons which seemed valid to Congress, we have not scrupled to interfere through acts of governments and otherwise, with the unhampered workings of that law and that doctrine. And he will and does claim that either either to him or to them similarly all round or give him the effective advantage of dispensations similar to those which have been granted in the case of other callings."

Mr. Khan has a reputation for sound, constructive thinking and his views might well be seriously considered by all classes of Canadians. Coupled with a vigorous immigration policy, we must develop a new interest in the problem of increased agricultural development.

Won The Wager

His climbing abilities-laughed at by a group of young Alpinists, an eighty-four-year-old Alpine guide, of Innsbruck challenged them to a race up and down the Zugspitze mountain, 10,600 feet high, for a wager of a dinner. Nine young climbers accepted the challenge and reached the summit slightly ahead of the veteran, but during the descent he passed all other competitors, and arrived at Innsbruck half an hour before the next man.

There are books in the British Museum inscribed on oyster shells, bricks, tiles, bones, ivory, lead, iron, copper, sheepskin, wood and palm leaves.

Men buried in snow can hear every word uttered by persons on the outside, but their own loudest cheers are inaudible.

Food! Felt Like

Vinegar in Stomach

Brooklyn, N. Y.—Mr. A. Arnest said he knew what I ate, it seemed as soon as it went down. I was bilious, belched gas, and acids rose in my mouth. Appetite was poor. I took Carter's Little Liver Pills for just one week and certainly was a fine remedy for me."

Treat a constipated condition in a sensible manner, cause the bowels to move daily. Pills from pain. Carter's Little Liver Pills for every member of the family. Small, sugar coated, easy to take.

Chicago's Crime Record

More Murders in First Ten Months of This Year Than Whole of 1925

Thirty-three murders and 52 more cases of manslaughter have occurred in Chicago during the first ten months of 1926 than for a corresponding period last year, according to a crime report made public today.

A total of 136 murders have been recorded against 123 for the corresponding period in 1925, while manslaughter cases have increased from 112 to 151, the report states.

Traffic violations, the same report shows, have jumped from \$9,162 to 109,997, while robbery dropped from 2,330 to 2,191, and liquor violations from 6,119 to 5,250.

1366

A Simple and Practical Girls' Dress

If you are thinking of making a new little frock for your young daughter, this is the simple and design you desire. The dress has the popular kimono shoulders, and long sleeves gathered to narrow wristbands. The neck has a front opening and is fastened with a small round collar. A favorite picture of a child of the skirt gives added width, and a belt and patch pocket complete this trim little dress. No. 1366 is 36 inches in size 6, 8, 10 and 12 years. Price 50¢. Size 8 requires 2½ yards 36-inch, or 1½ yards 54-inch material. 20 cents.

Our new Fashion Book contains many styles showing how to dress in a simple and graceful manner for well-dressed children. Clothes of character and individuality for the junior folks are hard to buy, but easy to make with our patterns. A small amount of money spent on material, cut on simple lines, will give children the privilege of wearing adorable things. Price of the book 10 cents the copy.

SUNDAY SCHOOL LESSON

NOVEMBER 28

GIDEON AND THE THREE HUNDRED

Golden Text: He strong in the Lord, and in the strength of his might—Ephesians 6:10.

Lesson: Judges 7:1-25.

Devotional Reading: Psalm 27:1-6.

Explanations and Comments

1. The Faithful Depart, verses 1-3—Gideon and his band were to fight against the Midianites under God's banner, and to God they appealed for victory. Let us then be sure of having them selves defeated their enemy, their numbers must be reduced.

Gideon therefore directed all who were ready to do so, and the number of them who were willing left the camp.

Possibly the men who had bragged most of what they would do to the Midianites were the very ones who were afraid to do so.

When the men who had bragged most of what they would do to the Midianites were the very ones who were afraid to do so.

When God needs men for His work He chooses the hearts courageous. When the single man in the world note, some one has observed, there are many in the Church who suddenly remember an engagement that prevents their being in the world.

The number of converts to the cause of God turned out to be two in three. Would it be low in moral battalions of today?

When God needs men for His work He chooses

HOW MOTOR CARS ARE SMUGGLED ACROSS THE LINE

Ottawa.—Hundreds of automobiles are smuggled every year into Canada and sensational disclosures are expected in the near future. The automobiles include both new and second-hand cars, some of them stolen in the United States.

Investigation already made by the Department of Customs shows that 50 per cent of the stolen cars smuggled into Canada are motor cars. The fact that there is no sale for second-hand cars in the United States swells the traffic.

Special officer Snow, who assisted Inspector Walter Duncan on the famous Balsallie case, has been assigned to the automobile inquiry, while detectives in the role of mechanics are said to have been posted in garages throughout the Dominion in the hope of gathering useful information.

The law provides penalties, but the trouble is to catch the smugglers, who are exceedingly crafty. The two old cars in the United States, says customs export papers on them and change the numbers on the cars using the same for the purpose of bringing in new cars at the valuation of the old ones. Not only that, but they use the same papers several times over. The cars are sold in Canada to unsuspecting purchasers who are fooled by the bogus papers. Autos thus smuggled into the country, of course, are subject to confiscation by the Government.

This method of evading the customs laws was explained today at the sitting of the customs investigating committee by C. P. Blair, customs official, who stated it was a method frequently employed in getting stolen cars across the border into the Dominion.

Dealing With China

No Policy of Brutal Force To Be Used By Powers

London—Downing Street is not aware that a "policy of brutal force" is contemplated against China by the foreign powers.

Senator Borah, chairman of the United States Senate foreign relations committee, recently warned the powers against the adoption of any imperialistic or ruthless attitude toward China.

Neither is it feared that the forthcoming report of the extra-territorially commission will be made an excuse for intervention in China. In fact it is stated, the British will be disappointed if the report does not help to conciliate the present Chinese factions.

Union Jack Painted On British Vessels

Plan to Protect Ships Flying in Chinese Waters

Shanghai.—In an effort to prevent their being attacked by the Chinese militarists along the Yangtze river, many British vessels plying in Chinese waters are having the Union Jack painted on their sides. Shippers hope this will make firing on them or commanding them inexcusable. The seamen's strike is reported to have been completely beaten. All strikers have been summarily dismissed and new crews employed.

Fair To Pay Sales Tax

Ottawa.—Two thousand companies in Canada did not pay their sales tax to the Government when it was due. This is not ascribed to inability to pay, but to the fact that no interest is charged on overdue payments. It is probable that an amendment will be introduced providing penalties that will greatly reduce the number of delinquents. Heavy penalties are provided for persons who do not pay their income taxes promptly.

Two Vessels Wrecked

St. John's, Nfld.—Two coasting vessels were wrecked in a wind storm that swept Newfoundland but no loss of life resulted, the crews of both vessels managing to reach shore after suffering great hardship. The Marion, of Carmanville, Captain A. Blundell, was driven ashore at Baccalieu and piled up on the rocks at Catalina.

To Hold Aloof Politically

Calgary—Executives of the U.F.A. insisted here recently that the principles set down in a resolution that U.F.A. federal members prevent their liability in the House of Commons as a group and not in any manner amalgamate or become part of any other group not organized on the same basis for political action as the U.F.A.

West Captures Prizes

Championships Won in Competition With Best Cattle on American Continent

Toronto.—Steppling out in international company representing the cream of the cattle on the American continent, five head of Saskatchewan cattle won two championships, two reserve grand championships, two firsts, one third, one fourth and one fifth prize at the Royal Winter Fair here today.

Two Aberdeen Angus calves, shown by W. J. F. Warren, Belbeck, scored a triumph for their owner, "Black Monarch." 11-month-old bull calf, captured first place in the junior championship and reserve grand championship in succession, while "Miss Quality of Belbeck" gained exactly similar honors in the female Aberdeen Angus classes for Mr. Warren.

G. K. Alonby, Crossfield, Alta., walked off with the junior bull championship in dual purpose. Shorthorners in both classes, the former winning the national championship in female classes.

Alberta made a killing in the Herdsmen, O. A. Boggs, Dayland, taking the male and female grand championships and both the senior championships, while Frank Collett, Crossfield, won the junior bull and reserve champion ship in female classes.

These two men made a clean-up in the Hereford classes, capturing, in addition to championships in ribbons, several premier and other prizes.

H. Hyslop and Son, Killarney, Man., also made a good showing in Herefords.

France Planning To Cut Standing Army

Bills Call for Reduction From 650,000 to 400,000 Men

Paris.—Reduction of the total number of men under arms in France from 650,000 to 400,000 is called for in a bill which will be introduced in the Chamber of Deputies. The measures also call for a reduction in the period of compulsory military service from eighteen to twelve months.

Bills, which will be introduced by Minister of War Paléologue, provide for the calling of conscripts at the age of 21 instead of 20 and for the recruiting of volunteers numbering more than 100,000. The volunteers will receive "fatigue details." Under this system the young soldiers will devote their entire year's training to purely military instruction.

The contingents of conscripts will be called up in half yearly sections in order to insure the presence under the flag of half the entire army with at least six months' training.

M. Palmeire estimates that the new law will increase the expenditures of the War Department at the beginning, but he proposes to make up the additional sum needed from the general and of the M.R. property of the Department of War.

Says Canada Is Prosperous

President of Canadian Bankers' Association Reviews Financial Situation

Montreal—A comprehensive review of the business and financial situation in this country the past year and the factors leading to the general improvement which is taking place were contained in the address of G. E. Nell, president of the Canadian Bankers' Association and general manager of the Royal Bank of Canada, who told a tale of prosperity at the annual general meeting of that body held in Montreal. Mr. Nell stated that the war of prosperity was reflected in a pronounced improvement in the banking situation in the Dominion and also dealt at some length with the return of this country to the gold standard, which was accomplished without any stress or strain whatsoever.

No in agriculture alone is found evidence of Canada's prosperity, stated Mr. Nell, who added that railroad earnings are satisfactory, building was most active during the past year, newspaper production has exceeded that of the United States, automobile production and export were at record level and that generally various lines of manufacture show satisfactory growth.

Australia May Have Minister

Toronto.—A special Washington dispatch for the Toronto Globe says: "The idea of Sir Hugh Deacon, Australian high commissioner to the United States, is to change to that of minister within three months time, according to information gained in an authoritative quarter."

Lady Willingdon Heads Red Cross

Toronto.—Following a visit by Viscountess Willingdon to the Red Cross national and provincial offices, it was announced that Sir Robert Borden is retiring as president of the Canadian Red Cross Society and that her excellency has accepted the office.

British Ship Hunts For Chinese Pirates

Escaped in Life-boat After Attacking and Firing Cruiser Hong Kong

Toronto.—A boatload of passengers from the British steamer Sunbeam which was boarded by pirates 50 miles from Hong Kong and badly damaged in a fight which ensued between the passengers and two officers of the ship have been brought here by the British destroyer Verity.

Twelve pirates were killed in the fight. The Verity rescued from the ship, the timely arrival of the British cruiser Bluebell saved it from destruction. Nine of the pirates were captured and the Bluebell is hunting others who escaped in a lifeboat.

Wireless reports from the Chinese owned steamer Hainan Peng, which is en route from Shanghai to Hong Kong say there are 20 casualties aboard. It is thought here it may prove another case of piracy, but the report received was too vague for any definite conclusions.

CUSTOMS PROBE IS REOPENED IN THE EAST

Ottawa.—Customs appraisers whose duty it is to place a value on goods imported into the Dominion sometimes make mistakes. Before the customs royal commission, which resumed sitting here, R. L. Calder, K.C., one of the commission counsel, stated that an importation of very valuable antique furniture entering the port of Montreal had been appraised as "second-hand furniture and rated as such" by the appraisers through whose hands it passed. Evidence taken before the commission showed that some of the appraisers were absolutely without qualifications for their work, Mr. Calder said.

Calder mentioned these matters when J. A. Watson,蒙特利尔 appraiser, was on the witness stand before the commission. Both Mr. Watson and his assistant, Edward H. Richards, informed the commission that they were not consulted in any way officially as to the choice of appraisers for the posts of customs appraisers at points outside Ottawa. Customs appraisers generally became known by promotion, Mr. Richards thought, but he and Mr. Watson agreed that the civil service commission was the body which would probably tell the commission about the matter.

Resumption of the hearing this morning was prefaced with an expression of regret from Chairman J. T. Brown that Sir Francois Lepine had retired from the chairmanship of the commission. It was announced that after the Ottawa sitting, the commission will proceed to Vancouver. A statement was submitted covering the number of trains seized at various points in Canada from 1923 to date. The largest number was made at Windsor, Ont., numbering 465. Next came St. John's, Que., 271; Montreal, 266; Vancouver, 237. Mr. Rowell explained that these were made from trains, which accounted for the large number made at some comparatively small places.

A statement was submitted covering the number of trains seized at various points in Canada from 1923 to date. The largest number was made at Windsor, Ont., numbering 465. Next came St. John's, Que., 271; Montreal, 266; Vancouver, 237. Mr. Rowell explained that these were made from trains, which accounted for the large number made at some comparatively small places.

He'd Rather Dodge a Bear Than a Motor

Col. Moore giving advice on a mountain journey to a fair visitor at Banff.

An encounter with a grizzly in the heart of the Canadian Pacific Rockies is a tame experience compared with dodging through traffic in Montreal, according to Col. Phil. A. Moore, pioneer guide of Banff, Alberta, who arrived at Windsor Station, Montreal, over C.P.R. lines recently.

But of course, Col. Moore feels definitely about bears and other wild animals than most people do. He knows them intimately, and has made a careful study of their habits and die-

PREMIERS ARE SHOWN BRITAIN'S LARGEST AIRSHIP

London.—The Dominion Premiers at Cardington inspected the structure of the new airship which is to bring Canada within two and a half days of London, as referred to by Sir Samuel Hoare, head of the British air ministry, at the Imperial Conference about three weeks ago.

The structural work on the ship so far has only advanced sufficiently to give an idea of its immense size. Nearby was R133, the military airship which flew above the German fleet when it surrendered on the conclusion of the armistice. Great as the R133 appeared it could pass within the framework of R161, the airship now under construction.

The R161, with a sister ship, will have accommodation for 300 passengers each and their baggage and 10 tons of mail matter. They will each have sleeping cables of two or four berths, promenade decks, lounges, smoking rooms and dining rooms capable of seating 50 people at one time.

For the benefit of the visitors, 323 were taken from its shed and it made an ascent.

Premier Mackenzie King has already indicated the intention of the Canadian Government to proceed with the erection of a mooring mast in Canada for the reception of airships.

Northern Branch Line May Be Extended

Would Form Junction in Manitoba With H. B. Railway

Winnipeg.—Extension of the Canadian National branch line at Gypsumville, Man., to Grand Rapids, on the Saskatchewan River, was promised by Sir Henry Thornton on condition that the undertaking can be shown to be profitable, according to a delegation that waited on the C.N.R. president here.

The proposed extension would form a junction with the Hudson's Bay Railway. The delegation was composed of Mayer R. H. Webb, of Winnipeg, representative of the Ontario-to-Bay Association and officials of other Manitoba organizations.

Conference Is Success

London.—"The Imperial Conference has not been doing much to attract publicity," said Lt.-Col. L. C. Amery, secretary of state for Dominion Affairs, in a speech here, "but from the point of view of mutual understanding it has been the most successful of all the imperial conferences." Col. Amery said he thought the amount of practical work accomplished by the various committees of the conference was greater than at any previous gathering of the premiers of the Empire.

Report On Land Settlement

London.—A lengthy report on land settlement is in the course of preparation by the Overseas Settlement committee of the Imperial conference. The report reviews the situations throughout the Empire and the steps taken by the different Dominions in connection with migration.

The Status of Dominions To Be Determined

London.—In connection with discussions by the Imperial Conference committee on Inter-Empire relations there is a proposal to widen the powers of the high commissioners of the various Dominions and give them semi-diplomatic functions. So far, however, the matter is in abeyance.

The conference resolution with reference to the Locarno spirit and the work done by Sir Austin Chapman, foreign secretary, in promoting peace in Europe, but it will not imply acceptance of the treaties by the Dominions. On this point, it is understood there has been a division of opinion among the Dominion delegates, while the resolution calling for the formal admission of the Dominions to the League is being搁置.

The proposed statement on the constitution of the Empire, on which the conference's committee on Inter-Empire relations has been working, is now taking definite shape. The statement, it is believed, will do the following:

1—Define more clearly than at present the status of the Dominions in the Empire.

2—Recognize Dominion autonomy, not only in purely domestic matters but also in questions of foreign policy primarily concerning such Dominion.

The premiers' committee of the Imperial Conference has not yet concluded its work, and some changes may yet be made in the statement outlined above.

Among the Canadian delegation there was evident a feeling of satisfaction at the way things are progressing at the Imperial Conference. "We have every reason to be pleased," said one influential member of the delegation. "We did not, of course, get everything we should like, but we made a greater advance even than we expected."

To Ratify G.T.P. Payment

Will Bring Down Legislation to Give Effect to Arrangement

Ottawa.—Hon. C. A. Dunning, Minister of Railways and Canals, announced that it is the intention of the federal government to bring down legislation at the December session of Parliament to give effect to the arrangement which was concluded in London in September last by the representatives of the Canadian National Railways and the holders of Grand Trunk Pacific four per cent debenture stock, over the payment of interest. There has been difficulty and dispute since the Grand Trunk Pacific was thrown into receivership in 1919 by the action of the former management. Advances received from London indicate that already the holders of more than \$4 per cent of the issue outstanding have accepted the arrangements. On this side, the scheme of arrangement requires to be ratified by Parliament.

There is talk now of taking a direct ballot of the men, in order, if possible, to avoid absolute adoption of the Government's proposals, which will be withdrawn if the Federation acts according to the vote of the districts.

Meantime, even in Wales, where the vote was against settlement, the men are resuming work in large numbers.

No British Envoys Will Be Appointed

Government Not Likely to Send Ministers to Dominions

Ottawa.—A cabled press report from London intimating that the British Government may appoint ministers in each of the Dominions is not accepted here in Government circles as at all likely. It is understood that in the official despatches reaching this country from the conference there has been no indication of such a step and it is thought to be doubtful if any such plan has been entered. A further report saying that the Prime Minister of the Dominions have declined to participate in the Locarno agreement by the Commonwealth.

The R161, with a sister ship, will have accommodation for 300 passengers each and their baggage and 10 tons of mail matter. They will each have sleeping cables of two or four berths, promenade decks, lounges, smoking rooms and dining rooms capable of seating 50 people at one time.

For the benefit of the visitors, 323 were taken from its shed and it made an ascent.

Premier Mackenzie King has already indicated the intention of the Canadian Government to proceed with the erection of a mooring mast in Canada for the reception of airships.

There is talk now of taking a direct ballot of the men, in order, if possible, to avoid absolute adoption of the Government's proposals, which will be withdrawn if the Federation acts according to the vote of the districts.

Meantime, even in Wales, where the vote was against settlement, the men are resuming work in large numbers.

BRITISH MINERS REFUSE TERMS TO END STRIKE

London.—The whole question of the coal settlement is again in confusion.

The Miners' Federation secretary, A. J. Cook, today announced that the district vote was against acceptance of the Government's terms of settlement of the strike. All the large districts were opposed to the conditions. This came as a great surprise to the leaders of the conference which had looked upon endorsement of the conference's agreement with the Government as a foregone conclusion.

No figures have been issued, but it is understood that the Government's proposals have been rejected by a majority of the districts.

There is talk now of taking a direct ballot of the men, in order, if possible, to avoid absolute adoption of the Government's proposals, which will be withdrawn if the Federation acts according to the vote of the districts.

Meantime, even in Wales, where the vote was against settlement, the men are resuming work in large numbers.

Young People Protest

Youth of Ontario Say They Are Progressing Along the Right Lines

Toronto.—A resolution repudiating the propaganda carried on by those interested in the return of the sale of liquor which has represented the young people of this province in most unfortunate terms, and calling for whole-hearted support of the Ontario Temperance Act, were the tangible results of three meetings held here which 7,000 young people from Toronto and districts attended.

Pursuing of the resolution followed addresses by several young men and women prominent in university and other circles in Toronto. At each meeting the speakers stressed the contention that young people were not going to the "how-downs" as some people thought, but were progressing along the right lines.

London Firm Insures Turkish Cruiser

Its Ship That Decided Turkey to Join Germany in War

London.—There is a flavor of irony in the fact, says The Daily Mail, that insurance of about \$5,000,000 has been placed with Lloyds, London, against risks of damage to the Turkish cruiser Sultan Yavuz Selim, formerly the German Goeben, which is being fitted into dock at Goldkup, near Constantinople, for repairs by German engineers. Early in the war, the Goeben, then belonging to Germany, arrived in Constantinople after a spectacular escape from British pursuers in the Mediterranean. The arrival of the Goeben through the Dardanelles was one of the factors leading Turkey to join Germany instead of the allies in the war.

Will Not Enforce Restrictions

United States Will Not Ban Workers From Crossing Line

Washington.—Officials of the Department of Labor, which has control over immigration matters stated that while restrictions on persons who live in Canada and cross the border daily to work in the United States will be gradually tightened, no wholesale action is contemplated.

Immigration officials realize that enforcement of any such policy would cause strong protest, not only from Canadian workers but from some United States citizens who live across the border.

Investigate Cancer Cure

London.—Another claim to a cancer cure is under investigation by the Medical Research Council of London, says the Daily Sketch. It was submitted with details of alleged cures, by Dr. Michael Graham, who has practiced for 60 years on the island of Madeira. The effective agency, says Dr. Graham, is a discharge from an irritation of the human system, the efficacy of which was accidentally discovered by Dr. Fortunate Pinto, of Funchal, Madeira.

B.C. Chooses Rhodes Scholar

Vancouver.—Albert E. Grauer, 20, a 25 graduate of the University of British Columbia, who is now attending the University of California in October, was chosen as British Columbia's Rhodes Scholar to take up residence at Oxford University through the selection committee for this province. Grauer was a member of the U.B.C. basketball team which participated in the finals for the Canadian championship at Ottawa.

Peace Through Education

People Should Study Way to Settle Disputes Other Than By War

Addressing the assembly gathered at Royal Victoria College, under the auspices of the McGill-Canadian Club and the National Council of Education, Lord Elgin stressed on a vital chord when he said education should be directed towards obtaining, if possible, some method of settling international disputes other than by the weapons of war. He said that emphasis should be placed upon the establishment of some court of tribunal which shall be effective without trial, resort to arbitration. As the speaker remarked, it is for the people who care, and who are willing to study and think, to try to create an atmosphere other than the dismal and slaughtered muck which represents the rough-and-ready devices of modern militarism, with its hideous instruments and appalling prospects of war, desolation and carnage. And this can only really be accomplished, if ever at all, by steady and persistent work for peace education amongst the young and within the family circle. No international treaties and no diplomatic signatures by themselves will ever erect a firm, solid barrier against the passions engendered by warfare or during the intense feelings raised when war is imminent or hostilities have actually begun. The outbreak of war in the last analysis rests upon an innate desire of public sentiment. To bring this about it is essential to see that it is, except under unusual well-defined circumstances, a travesty of our boasted civilization and shame to our race. What a pitiful confession of failure! It must be to vanity ourselves of conquering and ordering the world of things outside us, and never bring either to master or reduce to safe and secure orderliness those human relations which stand closer to our welfare than all other enterprises put together.—The Gazette, Montreal.

Was Once a Delicacy

People in Olden Times Ate Flesh of Porpoise

Epicures in the Middle Ages prized the flesh of the porpoise as a delicacy. A church dignitary of the period was frequently regaled with porpoise, and at the solemn installation of Bishop Neville, four of those cetaceans figured in the menu.

In 1701 the bailiffs of Yarmouth, presented a fine specimen of a porpoise to Lord Grey. The porpoise was accustomed to live in a cove in which it was said that they had chosen this present out one which would be especially acceptable to him.

The porpoise was a delicacy highly appreciated at Court. In the reign of the English King Henry III, they frequently appeared at the Royal table. At a sumptuous banquet prepared for Richard II, they also appeared.

At the splendid coronation feast of Henry VII, various dishes of porpoise were served. They were boiled and toasted, and rich pies and puddings were made of the flesh, in accordance with the prevailing taste—and digestion.

Good Queen Bess, who was credited with a refined taste for food, was fond of porpoise, and it often appeared on her table.

It was sold in the English markets up to the year 1575. After that it rapidly waned, and it was no longer prized as a delicacy.

Employment Situation is Good

The employment situation throughout the country shows further improvement and records are favorable. As recorded by the Dominion Bureau of Statistics the early part of October was healthier than any time since 1920. Reporting employers numbered 5,918 and their staffs had been augmented during the month by 2,221.

Affects Soviet Grain Exports

The appearance of Canadian grain, first on the world market, seriously has affected this year's export records, according to *Macroeconomic Life*, reporting that the collection of the Russian crop greatly has been delayed because of the attempts of the government to reduce grain prices on the interior markets.

Ontario Gold Production

Ontario continues its progress as a gold producer with a record production for the eight months of the present year of \$20,759,000. This is the high water mark in the history of the yellow metal in that province. The Provincial Government estimates a total year's output of \$22,000,000.

What'll you tak?" asked one Scotzman of another, "T'll tak' what you tak." "Then we'll tak' a wee walk."

Radio is said to have introduced 2,000 more words into the English language.

Bee蜡 Is Valuable

Every Particle Should be Saved as Demand is Greater Than Supply

Wax is a valuable product of the hive too often allowed to go to waste in many apiaries. Poured for pounds, bee-wax is more valuable than honey and the demand for the commodity is greater than the supply, therefore it is to the advantage of every bee-keeper to see that none is lost.

Wax is originally produced through certain glands in the bodies of the bees and is used by them for building comb and the capping over of brood and honey; therefore, every piece of comb from the hives and the cappings that are removed from the combs at extracting time, contains a certain amount of wax. In large apiaries, especially those run for extracted honey, the accumulation of cappings, broken or discarded combs, adventitious comb and scrapings from frames and hives will yield several hundred pounds of wax, while in smaller apiaries the amount may be comparatively small, yet enough to warrant the saving of it.

During the summer months when the bees are swarming every nine days, and especially when there is a heavy honey flow on, it may be found necessary to remove from the hives small pieces of honey or brood combs. These are usually thrown to the ground, which is not only a dangerous but a wasteful procedure. A solar wax-extractor standing in one corner of the apiary or some container to receive these small pieces of wax until such time as they can be melted down, would add to the returns of the apiary.

All broken or discarded combs and cappings—never mind how small the amount—will pay for the rendering. The present price of comb foundation should be incentive enough to save every particle of wax from the nippy.

Rooted in Canadian Soil

Many American Farmers Taking Up Permanent Homes in Canada

The New York Sun has been discussing the ebb and flow of population across the Canadian border. But it is not as much impressed with Canada's losses as some Canadians profess to be. It says, indeed, that "It is not only the natural gains by these sporadic movements it is Canada. Factory workers who come into the United States, the Dominion is destined to be but a temporary home, and will be destined for the most part to return to their own land when work becomes scarce for them here or more plentiful at home. Persons who buy farms, on the other hand, expect to make permanent homes on their property. When a family takes root in the soil it is not lightly removed."

The Sun sees many farmers from the United States thus taking root in Canada. Canada welcomes them. They are familiar, for the most part, with the farming methods which the Canadian West requires, they make good citizens, and their children will be thoroughly-going Canadians. The minority which refers to these people as "foreigners" is a small minority indeed. They are potential Canadians as soon as they come to Canada with the intention of remaining. They are actual Canadians as soon as they become naturalized. And their children, born in Canada and educated in Canadian schools, will contribute their quota of statesmen, and scientists, and artists, and writers to the Canada of tomorrow.—Toronto Star.

Kept Secret Sixty Years

World's Largest Clock Bell Cracked When Cast.

Big Ben, the largest clock bell in the world, which strikes the hour from the tower of the House of Parliament at Westminster, is cracked. This revelation was made by William Houghton, a member of the Ancient Society of College Youths, England's oldest bellringing fraternity who has been making an inventory of London's bells for phonograph records. The bell, which weighs thirteen and a half tons, has kept this secret for sixty years, for it is now disclosed that the crack developed when it was being cast in 1858. A hole was then bored in the bronze to prevent the crack from extending, and Big Ben has been declared as healthy today as he ever was.

Mrs. Smythe-Jones—"What a beautiful piano! But why have you (acted that piece of paper to it?"

Mrs. Newerliche—"That's to keep my husband from striking matches on it."

Captain of the Village Fire Brigade—"Eight planks of bear, ma, an' do ye mind weathers a bit quick? we be on our way to a fire!"—Passing Show.

Bobby (to father enjoying a smoke)—"Muvver us it isn't safe there, father, and you've either got to come away or let me carry the sandwiches."

Home-Loving Salmon

Salmon Tagged in B.C., and Released in Nova Scotia, Returns to Pacific Coast

The news story in *The Globe* on Saturday of the summer in which a race of sockeye salmon has been reared in British Columbia to take the all-Canadian route to the Fraser, and thus escape the dangerous American waters near Victoria, is an inspiring record. Formerly the growth of salmon in the Fraser River took the southern route, and were so largely captured by intensive fishing in United States waters that few reached Canada.

Scientists found that a few fish took the northern route, in all Canadian waters, and the eggs from these were hatched and the fry sent back to the Pacific. The homing instinct of the salmon is so strong that it invariably returns to the place of its birth after four or five years in deep waters, and by the same route. So this year there has been a heavy catch of fish returning from the far Pacific by the northern channel.

It is not only a victory of science for commerce, but it reminds us of the wholesome domestic instinct of this king of Canadian water resources. Last spring a salmon was taken in British Columbia waters which had been previously captured there, tagged and released in the Atlantic off Nova Scotia. This salmon had gone through the Panama Canal or around the extremity of South America in order to return to the waters of its birth.

These incidents invest the austere salmon with qualities almost human. May these qualities be embraced more fully by the ex-Canadians who have gone abroad to await the passing of post-war depression at home!

Canada Wants British Settlers

J. Bruce Walker Predicts Great Increase in Immigration Next Year

"Everywhere I went throughout Canada I heard the cry: 'Bring us more people,' said Sir George MacLaren Brown, European general manager of the Canadian Pacific Railway, at a gathering which welcomed him back after his recent tour in the Dominion. "I think this desire has impressed itself upon the government of Canada, and I hope it will be expressed in the bill which is now being referred to the Select Committee on Immigration at the Imperial conference."

J. Bruce Walker, Canadian director of European emigration, London, who has been associated with the deliberations of the Imperial conference committee on overseas settlement expresses the opinion that next year will see a remarkable increase over the last few years in the migration from Great Britain to Canada.

Message Fleeted Forty Years

Sailor's Note That Just Reached Halifax Was Dated 1867

A farewell message from John Lee, master mariner, to his widowed mother, believed to have floated around the world in a bottle for nearly forty years, has been received at Halifax.

The bottle was picked up in the Baltic sea at the Island of Bornholm by a young German cable engineer and forwarded to the Premier of Nova Scotia. It read: "To whom it may concern: I left another I died fighting. John Lee, Master Mariner, Halifax." It was dated "May 17, '87."

The paper was faded gray and the writing very faint, but legible. Mrs. Lee died 25 years ago. The fate of her son's ship, which sailed from this port, was never known.

An individual electric power plant consisting of a small generator, spring-driven, supplies sufficient current to operate a light bulb. Ten seconds of cranking by hand produces three minutes of light.

Ripe Fruit Shipped to Britain

Ripe plums are now being sent to England, arriving there in prime condition. The Ontario Department of Agriculture reports having made a trial shipment with excellent results, as attested by word from the other side. The plums were picked ripe and fully colored.

Wins Silver Cup

The silver cup for the best display of poultry at the Sesquicentennial Poultry Show was won by the Hon.

John S. Martin, Ontario Minister of Agriculture.

Everyone is young once, but some women are young several times.

City Noises Shorten Life

It is Always Tax on Nerves Says Chicago Doctor

If the rattle, bang or roar of the city could be eliminated, the average life of its residents would be prolonged by about seven years, declares Chicago's commissioner of health, Dr. Herman N. Bundesen. Individual and community efficiency would be at the same time materially increased.

"Noise is always a tax on nerves," said the commissioner who has been attempting to lessen the noise街 in the performance of daily work.

"Although one can and does get accustomed to noises which are a part of one's daily life, yet unusual and unnecessary noise tends to upset the nerves and cause annoyance. Constant din may also affect the brain in such a way as to cause dizziness, giddiness and nausea in some persons."

Visualizes City Of Future

Edison Tells What He Thinks It Will Be

The city of today has outgrown its usefulness in the opinion of Thomas A. Edison, who, in an interview by Edward Marshall in the current issue of *The Forum* magazine, visualizes the scientific city of the future.

In this city of the future, says Edison, will be of prime importance and traffic conditions will be solved by the use of the automobile, which will supplant the traffic policeman; crime will decrease before the advent of the scientific policeman and taxes will become unnecessary by the use of the scientific city of the future.

Noise in the city of the future, however, in the opinion of Mr. Edison, will increase rather than decrease, but the human being will become sufficiently deafened by nature so that his nerves will be able to stand the increased din.

Prince Unveils Table

To the dead man of the British Empire who fell in the Great War, a tablet was unveiled in Westminster Abbey by the Prince of Wales. It was erected by the Imperial War Graves Commission. It bears the arms of the Mother Country surrounded by those of the Dominions and India.

"Jim is a tremendously convincing talker, don't you think so?"

"I did until I heard him try to talk back to a traffic officer."

Necessary Factor In Modern Business

Publicity Constantly Required and Only Obtained Through Advertising

It used to be said that competition was the life of trade. In a recent speech, President Coolidge suggested a revision of the maxim. The life of trade nowadays, in his opinion, is advertising. He told the story of an American industry which had phenomenal growth in the '80s and '90s. This industry was an advertiser on a large scale. A time came when various concerns engaged in it were merged and consolidated. It was felt that it was no longer necessary to explain to the public the value of the product. Besides, since competition was the life of trade, it was an advantage to eliminate it.

It was the life of trade. The survey and engineering work are of the corporation who will take part will face dangers that will include.

Tidal waves, against which no man could stand, and against which special precautions are to be taken.

Canadian Cow Has Record

Another Canadian cow has captured the world's record for butter fat production. She answers to the name of Betsy Wylie, and is an Ayrshire owned by C. Crockett, of Middle Musquodoboit, Nova Scotia. Her record is 1,163 lbs. of butter fat from 21,965 lbs. of milk in the year.

Formerly this record was held by a cow, owned by W. C. Wylie, with 1,063 lbs. of butter fat from 23,223 lbs. of milk.

Manitoba Turkeys for Australia

A pair of turkey gobbler and hen have been shipped by the Manitoba Agricultural College to Australia. The Antipodes, it seems, has heard of the reputation won by the Manitoba College in turkey breeding. In building up a strain of extra quality bird—and decided to try out the feathered bipeds in a new torp.

A Reasonable Request

"I have only one request to make," groaned the college man who had come to work in the harvest.

"What is that, Mr. Smart?" returned the farmer.

"Please let me stay in bed long enough for the lamp chimney to cool off."

Voice over Wires—"Madame, your husband has been run over by a truck."

"Good Heavens! On the afternoon of my bridge party?"—Collier.

C.P.R.'s Finest Locomotive

Another marked improvement in the efficiency and construction of modern railway locomotives has been achieved by the Canadian Pacific Railway. Twenty-four "Pacific" type locomotives are being delivered to the company, and are the most powerful in use. They will be known as the G-3 class and are very similar in design to the well-known 2300 series of Pacific class locomotives. By a special application of the superheater, the boiler pressure is increased from 260 to 295 pounds per square inch. This is regarded as a highly important improvement, greatly increasing the speed haulage capacity and general efficiency. This was accomplished without increasing the weight of the locomotive by using a stronger

Montreal Man Wins Way Back To Health

Suffered for Months After Severe Attack of La Grippe, With Insomnia, Nervousness, Indigestion And Coughing. Found Relief.

Like thousands of others Ernest Beland, proprietor of Island Barber Shop, 391 Laurier West, Montreal, found long-sought relief from intense suffering in Tanlac.

Mr. Beland says: "At the end of a two-months' stay in La Grippe, I was so completely wrecked that my friends nor myself thought I would ever get well. For weeks I could not sleep.

"Pains in the lungs, shortness of breath, choking sensations and a nagging, watery cough were the most unbearable. Finally I was persuaded by a man who was benefited by Tanlac to try it out.

"I was able to get up and move about the house after taking two bottles of Tanlac, and by the time I had finished the seventh bottle I was able to return to work.

"I had an excellent appetite, sleep well and have gained 15 pounds.

"I feel fine in every way. It is with pleasure that I recommend Tanlac to any-

Tanlac is for sale by all good druggists—more than 40 million bottles have been sold. Let this marvelous tonic, made according to the famous Tanlac formula from bark and herbs, help bring you robust health and vigor, as it has to thousands of others. Ask for it by name.

New Tanks Are Terrifying

Premiers Saw Efficiency of Machines in Action

On the heather-clad hills of West

Surrey the Dominion Premiers who

attended the Imperial Conference saw

a tank in its efficiency. There were

one-man tanks which darted hither

and thither like waltzers on skates;

there were "honeymoon" tanks for

two which seemed to be everywhere

at once, and there was the latest

tank of all, the "Battleship of the

Land," which cheerfully climbed huge

obstacles of fallen trees, crashed

through wire entanglements and then,

turning in its own length, jumped a

trench and swept through a nine-inch

brick wall as though it were nothing

but paper.

It was a fascinating demonstration

of new methods compared with old,

albeit terrifying in its illustration of

what may be expected should the

war break loose again.

The demonstration was carried out

in a driving rain which plastered

everything with mud. It opened with

a couple of the tanks which created so

much consternation when they first

appeared on the Western front in the

hard days of September, 1916. The

leading tank waddled like a grand-

father among so much that is now.

Tanks of all types and kinds fol-

lowed in a bewildering succession.

There was one type which can do 30

miles an hour on the road and can be

converted from wheels to tracks in 60

seconds. Horse-drawn artillery units

passed by in all their panoply, suc-

ceeded by the mechanical type with

the same guns hauled by tanks over

road and with a mobility which

no horse could possibly equal.

The tanks went into action. From

everywhere and nowhere apparently

tanks appeared, their guns crashing

and spattering until they vibrated

and one wondered what would have

happened to the soldiers if tanks had

not been firing merely blanks. A

couple of the tanks collided. A whi-

pet dashed away with a damaged tur-

The mimic war ended. Then the

tanks showed what they could do in

climbing and passing obstacles. The

THIS MOTHER GLAD DAUGHTER IS WELL

Mrs. Parks Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Daughter's Health

Toronto, Ontario.—"My daughter is 16 now and has been an invalid ever since she was six months old and has been compelled to remain out of school ever since the time we. We have tried different kinds of medicine, but it helped her much. I had taken Lydia E. Pinkham's Vegetable Compound and when I was run-down, and it had helped me so much that I thought it might help her at the time when she had got well again. She began taking it. She attends school every day now and goes skating, and does other out-door sports. I recommend this medicine to any one who is run-down and nervous and weak."—Mrs. PARKS, 106 Bond Street, Toronto, Ontario.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for young women's troubles.

For sale by druggists everywhere, C.

Canada's New Minister To Washington

Duties May Be Largely Devoted to Matters of Trade

Hon. Vincent Massey's official title as Canadian minister in Washington is "envoy extraordinary and minister plenipotentiary." His duties, as broadly stated in the order-in-council, which recommends that the King be humbly moved to appoint him, are "to represent the United States of America, the interests of the Dominion of Canada." It was the intention in the original agreement of 1920 between the British and Canadian governments that the Canadian minister should be a member of the British embassy and would have charge in the absence of the ambassador of the embassy and of the representation of imperial, as well as of Canadian interests. This part of the original plan has been abandoned and Mr. Massey will represent Canada only.

It has been considered desirable, in view of the increasing range, importance and complexity of the economic and financial relations between Canada and the United States that the dominion should be represented at Washington by a diplomatic representative with a first hand knowledge of Canadian conditions. Mr. Massey will serve as the ordinary channel of communication between the two governments and will act upon instructions of the secretary of state for external affairs (Premier King) and report to him.

The new arrangement does not denote any departure either on the part of the British government or of the Canadian government from the principle of the diplomatic unity of the British empire.

President Coolidge has indicated that the United States law does not permit of the appointment of a U.S. ambassador or minister to Canada, and that consular matters in which Canada is concerned are handled directly under present arrangements. For the present, therefore, Mr. Massey's efforts may be largely devoted to matters of trade. Canada's total business with the United States exceeds a billion dollars annually, so that the new envoy extraordinary should have plenty to keep him busy. Canadian mills sell one hundred million dollars worth of newsprint to United States publishers every year, \$45,000,000 worth of saw-mill products, \$57,600,000 worth of metal and metal products. Exports include \$70,000,000 of livestock and animal products, while among the imports from the U.S. are 50 or 60 million dollars worth of coal every year.

Could Not Seize Harp

Instrument and Player Were One

Time Immune From Taxation or Debt

The harp, which is once again becoming popular in Wales, was once held in such high esteem among the Celtaic races that to be able to play it was regarded as one of the indispensable qualifications of a gentleman.

In those days the instrument was the only thing coming within the term "household utensils" that could not be confiscated for debts, while it is of interest to note that a one-time "Professor of the Harp" was immune from civil proceedings of any kind and his lands free of all taxation.

Will Preserve Church

The ancient church of Warburton, Cheshire, one of the last of the old wooden churches of England, will be repaired as a memorial to the late rector, Rev. Geoffrey Edgerton-Warburton. The church's origin dates back to the 12th century.

An educational campaign is being conducted in the Philippines which will be a weight of more than a hundred tons of bell metal suspended in the tower.

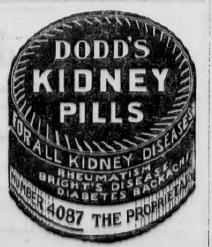

In addition to the carillon, there will be mounted next February the Westminster chimes which will be governed by the great clock in the Peace Tower.

Air passenger lines in Europe are considering the establishment of a co-ordinated European winter air

line.

Even mean people sometimes give themselves away.

Be sure of your fattest calf before essaying the role of the prodigal son.

Children's Colds

Art bestrewn with colds overnight without "dressing" by rubbing Vicks VapoRub on the nose and chest at bedtime.

British Settlers For Canada

One Thousand More British Settlers to Come to Canada Next Year

One thousand more British families are to be brought to Canada next year to settle on farms and Hon. Robert Forde is to be sent to the task of securing suitable land there for them far from a railway. The newcomers will take up land in all parts of the Dominion, but mostly in Ontario and the West, where the majority of the 2,600 families already brought out by Mr. Massey will represent Canada only.

It has been considered desirable, in view of the increasing range, importance and complexity of the economic and financial relations between Canada and the United States that the dominion should be represented at Washington by a diplomatic representative with a first hand knowledge of Canadian conditions. Mr. Massey will serve as the ordinary channel of communication between the two governments and will act upon instructions of the secretary of state for external affairs (Premier King) and report to him.

The Hudson's Bay Company has placed 2,600 quarter sections at the disposal of the Minister of Immigration, and the C.P.R. likewise has offered him 1,500 quarter sections. The minister will have an investigation made by the land settlement board to ascertain the value and suitability of these lands for British

IS THERE A BABY IN YOUR HOME?

Is there a baby or young children in your home? If so, you will be wise to buy "Baby's Own Tabby." Childhood all too quickly and means should always be at hand to promptly fight them. Tabby is the best remedy for childhood ills. It is the best remedy for the other end terminates in a whistle. Rudolph Oblatz, a New York jeweler, says: "Buy Tabby. Mrs. Wells, my wife, said there were four jewelers interested in the purchases. If there should not be a woman sufficient to purchase Catherine's crown, Mr. Wells proposes to break up the diadem and sell the stones separately.

Mr. Wells had not yet decided the Soviet Government's treasure house.

There still remains in the vault in excess of \$200,000,000 worth of imperial jewels which Russia purposes to turn into cash for the purchase of plows, machinery and locomotives and for other practical needs.

Great Carillon To Ring

Will Hold Ceremonial in Connection With Inauguration of Bella at Ottowa

Within a few weeks after the opening of the next session of the Canadian Federal Parliament which is to be, according to present arrangements on Thursday, December 9th next, the bells of the Peace Tower will be installed in the Peace Tower of the Canadian Parliament will be in operation.

Arrangements are being made for the holding of a suitable ceremonial in connection with the inauguration of the carillon.

The bells of the Peace Tower carillon number fifty-three. They have all been cast and tested in a new bell foundry specially constructed for the job and, although the carillon of Park Avenue Baptist Church in New York is equal in size, and those two are the largest in the world, the founders are satisfied that they have turned out a carillon that will last the world over for perfection of tone for many years to come.

The largest bell is ten tons in weight and in tune low "E." When the fifty-three are in place there will be a weight of more than a hundred tons of bell metal suspended in the tower.

In addition to the carillon, there will be mounted next February the Westminster chimes which will be governed by the great clock in the Peace Tower.

Air passenger lines in Europe are considering the establishment of a co-ordinated European winter air

line.

Machine Guns Mounted on Trains in Mexico

Machine guns are mounted on trains leaving the international boundary between Arizona and Mexico, to protect travellers from the depredations of rebellious forces in interior Mexico.

Military escorts on the trains have been doubled from 50 to 100 men on each train. The machine guns are set in place at both ends of the car.

These precautions, say military officials at Phoenix, Sonora, are taken because of the activity of Yaqui Indian bands in Sonora.

Simple and Sure

Electric Oil is so simple in application that a child can understand the directions. Use an oil lamp and when used the only direction is to rub, and when used as a dressing to apply. The directions are as plain and unmistakable as they are readily understood by young or old.

Will Protect Travellers

Machine Guns Mounted on Trains in Mexico

Hiring Help in London

"Want" Ads Show Maids Are Accorded Many Privileges

No naggings, ten weeks vacation, plenty of fresh eggs and bacon, radios and the use of an automobile are all inducements offered by wealthy London women in search of domestic help so difficult to get these days. Here are a few "want" ads from London newspapers.

Housemaids—Ten weeks holiday in the year with board and wages. Use of car now and then.

House parlor-maid—Electric light and central heat throughout, also radio. Outings assisted by car if desired.

Maid—Good carings, also weekly and night and night every three weeks.

Good cook—also good eggs and bacon, Cooksgirl—good cooking, and week-end once a month. No naggings.

Cook—Help given, own bathroom, heat, light and radio.

Upper house-maid—Dresses materials and valuable presents given. One room furnished to suit.

Won Fortune From Kaiser

Widow Broke Will Which Left Wealth to German Ruler

During the war the ex-Kaiser of Germany just missed adding another million to his fortune by an adverse decision of the Dresden High Court. A wealthy Saxon died and left the greater part of his wealth to Wilhelm II, the will leaving his widow alone penniless.

The widow asked the ex-Kaiser to renounce the legacy in her favor, and on his refusal, she brought an action to have the will declared illegal. The court decided in her favor, and awarded her the big sum her husband had willed to the ex-Kaiser.

Sun Keeps Earth Going

If the earth were taken away from the sun for a year the ocean would not only be frozen, but the atmosphere would be condensed to liquid air, washing only the ice rocks of a frozen sea, in the opinion of Professor E. N. Russell, of Princeton.

The palmist has no use for the man who is afraid to show his hand.

Lord Willingdon Honored by McGill

Lord Willingdon, Canada's new Governor-General, was honored by McGill University in Montreal recently, when the honorary degree of LL.D. was conferred upon His Excellency at the McCallum University Convocation Hall. In Lordship's first official visit to Montreal where he arrived to the ceremony on October 6th. He was met at the Windsor Street Station by E. W. Beatty, President of the Canadian Pacific Railway and Chancellor of McGill University, and Sir Arthur Currie, Vice-Chancellor of the Uni-

versity for the degree of Doctor of Laws. When the degree was bestowed the entire assemblage stood and cheered. In his acceptance speech, Lord Willingdon said: "I rise for one moment only as visitor to this University, and by that office, as I understand it, the representative of our beloved Sovereign, the King, I urge you to accept this honorary degree of this university, my sincere appreciation of this high honor that you have done me today in giving me the honorary degree of LL.D." In the Governor-General's speech, he said: "I have placed my trust in the Governor-General, taking him much on trust, as they knew very little about him beyond hearsay. "I can only say he has a good name, and I sincerely hope that the future years will show that he is worthy of the trust you have given me this afternoon."

The photograph shows from left to right, Lord Willingdon, E. W. Beatty, Chancellor of the University, and Sir Arthur Currie, Vice-Chancellor, in full academic gowns.

Around the Town

A quiet wedding was solemnized by Rev. Morgan on Wednesday when Miss B. Jamieson became the bride of Mr. Ralph Lakey.

Mr. White, organizer for the Orange lodge, was in town on Monday.

The Elks held a very enjoyable whisky drive in their hall on Friday evening.

We understand that Mirror is being augmented to a railway point and that our neighboring town will have to do without the terminal.

The owner likewise made to deposit a sum sufficient to cover the cost of the appraisal.

The claim of Mr. Welty through his attorney, for return of impounded horses sold to Walter Simpson, of Lacombe, the reverb was asked to try and a range with Mr. Simpson for their return, with full powers to have the matter settled.

Municipal convention at Calgary, Councillor Crown moved that Councillor Cunningham and the secretary represent the council at that convention.

On motion of Councillor Cunningham a grant of \$10 was allowed for school fair at Clive.

On motion of Councillor Crown, the secretary was instructed to arrange for a contract with Lacombe hospital re indigent patients.

A number of accounts were passed for payment on motion of Councillor Jewell.

The meeting then adjourned.

"All domestic animals are hereby restrained from running at large within the limits of the municipal district of Lamerton at all times."

On motion of Councillor Crown it was agreed that a resolution be presented to the next convention of Municipalities meeting at Calgary asking for an amendment to the Domestic Animals Act so that when a claim for damage is made the claimant shall make a deposit with the poundkeeper sufficient to cover the costs of the appraisal and that if such costs are found against the defendant they shall be added to and become a part of the damage claim and shall be payable to the poundkeeper before the stock can be released; should the stock be released before these matters are settled, that

Harold Oldring left this week for Leduc where he has been stationed by the bank, A. Morrison going to Alix.
